Avg. Yield

LSD: Least Significant Difference

¹Keiser = Northeast Research and Extension Center
 Marianna = Lon Mann Cotton Research Station
 Stuttgart = Rice Research and Extension Center
 Rohwer = Rohwer Research Station

²Trials experienced some significant bird damage

³The trial at the Marianna location was originally planted April 7 and a second time May 10. Insufficient stands and uniformity resulted in each planting being abandoned. A successful third planting was established on June 7.

⁴The irrigated and non-irrigated trials at the Rohwer location were originally planted on April 7. Bird predation after emergence resulted in both trials being abandoned. Both trials were successfully replanted on May 10.
